Gaming BD & Market Intelligence | Data Analytics | Studio Outreach

PROFESSIONAL SUMMARY

Business Development and Market Intelligence professional with 3.5+ years of experience across game development, AR/VR project operations, data analytics, and studio outreach. Currently at Brothers Interactive as BD & Outreach Specialist, achieving a 30%+ outreach response rate — 3–5× above industry average — by combining Python-driven Steam market research with targeted, data-backed communication strategies. Proficient in SQL, Python (Pandas, EDA), Power BI, Tableau, and Advanced Excel. Strong understanding of the gaming industry from first-hand Unity3D development experience. Passionate about using market intelligence and outreach to build meaningful studio partnerships.

KEY ACHIEVEMENTS

30%+ Outreach Response Rate (3–5× Industry Avg)	100+ Studios & Publishers Contacted	500+ Steam Titles Analysed via Python	1 Signed Studio Partnership Closed
---	---	---	--

SKILLS

BD & Outreach	Studio & Publisher Outreach, Lead Generation, Pipeline Management, Steam Platform Research, Competitor Analysis, Market Intelligence, Stakeholder Communication, Email & LinkedIn Outreach, Discord Community Engagement
Data Analytics	SQL (JOINS, CTEs, Window Functions), Python (Pandas, Matplotlib, EDA, Web Scraping), Power BI, Tableau, Advanced Excel, PostgreSQL, MySQL, Data Cleaning & Transformation, Dashboard Development
Gaming & Tech	Unity3D, C# Basics, AR/VR Workflow, Steam Market Analysis, GitHub, QA Testing & Debugging, Agile & Scrum Fundamentals, Socket.io (basics)

EXPERIENCE

BD & Outreach Specialist | Brothers Interactive *October 2025 – Present*
Jaipur, India

- Achieving a **30%+ outreach response rate** — 3–5× the industry average of 5–10% — through targeted, research-first communication across Email, LinkedIn, Discord, and gaming communities.
- Contacted **100+ indie studios, publishers, and gaming companies**, building a structured lead pipeline from initial market research through qualification to partnership discussion.
- Scraped and analysed **500+ Steam titles using a custom Python script** (1,310 lines) to extract genre trends, pricing data, review trajectories, publisher activity, and social presence for BD targeting.
- Closed **1 confirmed studio partnership**, owning the complete BD lifecycle from market identification and outreach to signed collaboration agreement.
- Maintained structured outreach dashboards and lead scoring datasets in Excel to monitor pipeline health, response rates, and studio tier classification.
- Collaborated with internal creative and strategy teams to align outreach campaigns with Brothers Interactive's service offerings and market positioning.
- Documented research workflows, outreach playbooks, and communication templates to build scalable, repeatable BD processes.

Data Analyst Fellowship Program | NextLeap *April 2025 – August 2025*
Remote, India

- Built interactive business dashboards in Tableau and Power BI to analyse KPIs, trends, and performance patterns for data-driven decision support.

- Practised advanced SQL queries including JOINS, GROUP BY, CTEs, and Window Functions on real-world business datasets.
- Performed exploratory data analysis (EDA) using Python, Pandas, and Matplotlib to uncover insights and prepare visual reporting outputs.
- Delivered analytics projects on customer segmentation, revenue forecasting, and structured reporting workflows.
- Improved data cleaning and transformation processes for structured analysis and dashboard-ready reporting.

AR/VR Executive | AICMUJ IF

March 2023 – April 2025

Jaipur, India

- Led AR/VR project coordination across immersive application development cycles, ensuring timely delivery and cross-team alignment.
- Tracked project KPIs and operational metrics through Excel dashboards, producing regular performance reports for stakeholders.
- Collaborated with design and technical teams to streamline development workflows and reduce delivery blockers.
- Researched emerging AR/VR technologies and evaluated implementation opportunities to improve product and operational efficiency.
- Assisted in testing, debugging, and process optimisation across multiple development workstreams.

Unity Developer | Mobzway Technology

July 2022 – February 2023

Jaipur, India

- Developed 2D casino games in Unity3D with focus on gameplay performance, visual quality, and cross-platform stability.
- Collaborated with design teams on user interaction design, game flow improvements, and visual asset integration.
- Performed debugging, QA testing, and performance optimisation across multiple game builds.
- Explored multiplayer integration using Socket.io and documented QA outcomes through structured Excel tracking.

PROJECTS

IPL Performance Analysis | Python · SQL · Tableau

[GitHub](#)

- Analysed IPL player and team datasets to surface scoring trends, consistency metrics, and comparative match insights across multiple seasons using Python, SQL, and Tableau.

Airbnb Market Analysis | SQL · Advanced Excel

[GitHub](#)

- Conducted SQL-based analysis on Airbnb data using JOINS, CTEs, and aggregations to identify pricing strategies, occupancy trends, and regional market performance insights.

E-Commerce & Visa Transaction Dashboards | Power BI · Excel · Python

[GitHub](#)

- Built KPI-focused Power BI dashboards tracking revenue trends, customer spending behaviour, payment patterns, and product performance with drill-down filtering for business intelligence reporting.
